Outlook for Accountability

Juan D’Brot, Erika Landl, Chris Domaleski and Chris Brandt
Center for Assessment

Reidy Interactive Lecture Series, September 2, 2020
The National Center for the Improvement of Educational Assessment, Inc. (The Center for Assessment) is a Dover, NH based not-for-profit (501(c)(3)) corporation. Founded in September 1998, the Center’s mission is to improve the educational achievement of students by promoting improved practices in educational assessment and accountability.
The Center's COVID-19 Response Resources

State and district leaders are facing multiple concerns in response to widespread and potential long-term school closures due to the growing threat of COVID-19. The concerns are broad and consequential. Leaders are rightfully prioritizing the safety and welfare of students and the community. We have been inspired by the dedication and resourcefulness of leaders who are ensuring essential services, such as meals, are provided as well as facilitating innovative approaches to support remote learning.

Additionally, the school closures present substantial assessment and accountability implications and numerous challenges for state personnel. The Center for Assessment is poised to support our assessment and accountability colleagues around the country with technical, practical, and policy guidance and advice. We launched this page to help you efficiently find the resources you need during these uncertain times.

The resources are organized by the major categories of assessment and accountability and reflect the issues we anticipate state and district leaders will be dealing with over the next few weeks through next year. We hope you find these resources useful and if there is a question that you would like to see addressed, please email us or tweet at us. We continue to wish you all the best in these uncertain times.

Featured Resources
- Restart & Recovery: Assessment Considerations for Fall 2020
- Classroom Assessment Learning Modules to Support Re-Entry Fall 2020 & Beyond
- Meeting the Moment: A Novel Format for RILS to Address Implications of the COVID-19 Pandemic

Accountability
- School Disruption Due to COVID-19A High-Level Overview of Likely Implications and Options for Assessment and Accountability
- School Disruption Due to COVID-19A High-Level Overview of Likely Implications and Options for Assessment and Accountability
- Considering Equity Within Accountability Systems in Response to Interruptions in Schooling: Making Accountability Systems Help
- The Outlook for ESSA School Accountability After COVID-19
- Dealing with Fallout from COVID-19 School Disruptions: What to do Next in Assessment and Accountability?
- Program Evaluations under COVID-19
- Rethinking School Accountability for the 2020-2021 School Year

Assessment
- We're All In This Together, Dealing Fairly with Assessment Contracts as Schools Cancel or Suspend Student Testing During the COVID-19 Crisis
- An Assessment Response to Anticipated Learning Gaps, Implications of School Closures on Assessment Needs
- In Search of Continuity of Student Learning After Extended School Closures

General Information & Zoom Protocols

• This webinar is being recorded and will be posted on the Center’s RILS webpage: https://www.nciea.org/events/rils-2020-implications-covid-19-pandemic-assessment-and-accountability

• You can download this slide deck on the RILS webpage above

• **Introduce yourself in the chat**—your name and position

• Use the Q & A to ask questions at any time
Overview of Today’s Webinar

3:00 Welcome & Overview - Chris Brandt, Center for Assessment
3:10 Introduction to CCSSO Paper “Outlook for Accountability” Chris Domaleski, Juan D’Brot, and Erika Landl, Center for Assessment
3:40 Introduction of Panel
3:45 Chris Janzer, Director of Accountability, Michigan Department of Education
3:55 Maria Harris, Assistant Superintendent of Assessment and Accountability, Oklahoma Department of Education
4:05 Chad Buckendahl, ACS Ventures
4:15 Moderated Q&A
4:30 Adjourn

A draft version is available on the Center’s RILS site

Objectives for Paper

1. Propose guiding principles to inform states’ approaches to restarting accountability.

2. Outline a process to examine key decisions for accountability in SY 2020-2021.

The Goals of School Accountability

• Signal prioritized outcomes such as:
  • Promote equity
  • Improve readiness for post-secondary success
• Incentive actions and interactions that serve to support these outcomes
• Provide information that serves to inform school improvement efforts
• Articulate a system of supports and interventions based on performance.

Domaleski, et. al., 2018 – Promoting More Coherent and Balanced Accountability Systems
Guiding Principles to Inform Decision Making

1. Re-examine the Accountability Theory of Action in Light of State Priorities
2. Consider Type I and Type II Errors
3. Leverage “Big-A” and “little-a” Solutions
4. Consider Restarting Accountability in Stages
Consider Type I and Type II Classification Errors: Example for CSI

<table>
<thead>
<tr>
<th>The school is classified as CSI</th>
<th>The school truly is among the lowest performing in the state</th>
<th>The school truly is not among the lowest performing in the state</th>
</tr>
</thead>
<tbody>
<tr>
<td>Correct Decision</td>
<td>Type I Error – False Flag</td>
<td></td>
</tr>
<tr>
<td>The school is not classified as CSI</td>
<td>Type II Error – Failed to Flag</td>
<td>Correct Decision</td>
</tr>
</tbody>
</table>
Focusing on Improvement: “Big-A” and “little –a” Solutions

- Identify components for reporting (internal or external), but do not use them to inform high-stakes decisions.
- Work with districts and schools to identify new data elements that can inform school improvement.
- Share resources and promising practices to support school improvement efforts.
Consider Restarting Accountability in Stages

• Inherent in the decision-making process defined within this paper
• Carefully consider options for accountability in light of priorities, constraints and potential threats to the validity of system-based results.
• Leverage reporting and school improvement initiatives to supplement missing data in SY 2020-2021 and beyond.
A Process Examining Decisions for Accountability in 2020-2021 (Key Questions)

• How well does our system align with the state’s theory of action, policy goals, and priorities?

• Do we need to revise our system to better reflect existing or shifting state priorities?

• What claims should be evaluated that we are making at the indicator and system level? What is the impact on our overall system if certain claims cannot be substantiated?

• Given the potential impact of COVID-19 disruptions on the system’s claims and data, how should we approach accountability implementation in spring 2021? How should results be used?
Choose Your Adventure!

Process promotes:

- thoughtful reflection and confirmation of system goals
- clear specification of claims and assumptions to be supported
- evidence-based decision making
- The specification of multiple, potential options for implementation
The Four Phases

- **Design Phase**: Confirm state’s goals/priorities for the accountability system.
- **Development Phase**: Identify desired accountability system design for 2020-2021 and evaluate feasibility based on available data and evidence.
- **Implementation Phase**: Specify primary and secondary plans for implementation in 2020-2021.
- **Evaluation Phase**: Evaluate the system using data from 2020-2021.
Design Phase

Consider the goals and priorities reflected in your current accountability system.

Have the state’s goals or priorities for accountability changed?

Articulate how the system needs to change to support these new priorities.

Is the existing system design appropriate to meet these goals in 2021?
Development Phase

- Are all components available and do they meet criteria to support claims for the new/ revised indicators?
- Examine Indicator Claims and Evidence
- Are all components available and do they meet established criteria to support claims for the legacy indicators?
- Examine Model Claims and Evidence
- Does the evidence support the intended claims for the new model?
- Evaluate evidence with respect to REVISED claims
- Does the evidence support the intended claims for the legacy model?
Step 1. Evaluate Indicator Claims & Evidence

• **Completeness:** To what extent are elements of the data missing?

• **Consistency:** Were the data properties altered?

• **Impact:** Is it likely data values (e.g., performance) will substantially change?

• **Practicality:** Is it feasible and/or reasonable to collect and report the data?

### The gaps in completeness are:

<table>
<thead>
<tr>
<th>Low</th>
<th>Moderate</th>
<th>High</th>
</tr>
</thead>
<tbody>
<tr>
<td>The indicator is complete. The depth and breadth to the data elements are unchanged. When comparing to pre-pandemic circumstances, completeness appears to be sufficiently similar.</td>
<td>There is some incompleteness in the indicator. The depth and breadth of the data elements demonstrate some differences. When comparing to pre-pandemic circumstances, there is some deviation from the typical completeness of the indicator.</td>
<td>The indicator is incomplete. The depth and breadth of the data elements are not reflective of pre-pandemic data. There are significant deviations from the typical completeness of the indicator.</td>
</tr>
</tbody>
</table>
## Indicator Summary

<table>
<thead>
<tr>
<th>Indicator Summary</th>
<th>Completeness</th>
<th>Consistency</th>
<th>Impact</th>
<th>Practicality</th>
<th>Bin</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Chronic Absenteeism</strong></td>
<td>Low</td>
<td>Low</td>
<td>Low</td>
<td>Low</td>
<td>Green</td>
</tr>
<tr>
<td><strong>Achievement</strong></td>
<td>Low</td>
<td>Low</td>
<td>High</td>
<td>Low</td>
<td>Yellow</td>
</tr>
<tr>
<td><strong>Growth</strong></td>
<td>Moderate</td>
<td>High</td>
<td>High</td>
<td>Moderate</td>
<td>Red</td>
</tr>
</tbody>
</table>

9/2/2020 | www.nciea.org
Step 2. Evaluate Model Claim & Evidence

• What claims need to be supported for each component of the accountability system?

<table>
<thead>
<tr>
<th>Table 4. Indicator and System of AMD Claims</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>System Component</strong></td>
</tr>
<tr>
<td>Individual Indicator within the system of AMD</td>
</tr>
<tr>
<td>Indicator Interaction for the State’s system of AMD</td>
</tr>
<tr>
<td>System of Annual Meaningful Differentiation</td>
</tr>
</tbody>
</table>
Step 2. Evaluate Model Claim & Evidence

- What claims need to be supported for each component of the accountability system?
- What is the likely impact on different elements of the system of annual meaningful differentiation?

### Table 4. Indicator and System of AMD Claims

<table>
<thead>
<tr>
<th>Decision Point to Consider on Overall System of AMD</th>
<th>Overall Impact to System (low, moderate, or high)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact on aggregated weights or sequence of decision rules to the overall system of AMD</td>
<td>Moderate</td>
</tr>
<tr>
<td>Impact on the rankings and groupings created via the system of AMD</td>
<td>Moderate</td>
</tr>
<tr>
<td>Impact on the meaningful identification of CSI, TSI, and ATSI schools</td>
<td>Low (due to delay in identification based on missing 2019-2020 data)</td>
</tr>
<tr>
<td>Impact on the timing of identification of CSI, TSI, and ATSI schools</td>
<td>Low (due to delay in identification based on missing 2019-2020 data)</td>
</tr>
</tbody>
</table>

### Table 5. System-level evaluation of claims.

- The indicator weights or decision rules reflect the state’s theory of action and stakeholder vision.
- The empirical indicator weights reflect the intended state priorities and promote valid, fair, and reliable school ratings.
- The empirical results of decision rules reflect the intended sequencing of decision rules to promote valid, fair, and reliable school ratings.
- The indicator weights or decision rules do not impede the usefulness or interpretations of how schools are differentiated.

- Results from the state’s system of AMD align with objectives and policies around subgroups and school size, setting, and demographics.
- School rankings and groupings created via the state’s system of AMD reflect data as intended. That is, rankings are not skewed, inappropriately distributed, or include schools that are unexpectedly low or high performing.
- Results from the state’s system of AMD reflect meaningful differentiation among schools.
Step 2. Evaluate Model Claim & Evidence

- What claims need to be supported for each component of the accountability system?
- What is the likely impact on different elements of the system of annual meaningful differentiation?
- What options should be considered based on the likely overall impact to the system?

Table 4. Indicator and System of AID Claims

Table 5. System-level evaluation of claims.

Table 6. Example of accountability options based on review of system impact.

<table>
<thead>
<tr>
<th>Impact to Overall System</th>
<th>Options based on review of System Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>Explore a transitional system of accountability. A waiver or amendment will likely be necessary because implementation should require substantive changes to process, procedures, policies, or data collection.</td>
</tr>
<tr>
<td>Moderate</td>
<td>Explore a transitional system of accountability. Evidence will determine whether a legacy or revised system is feasible. A waiver or amendment may be necessary if changes to calculations, properties, or procedures could be considered substantively different, even if changes only seem minor.</td>
</tr>
<tr>
<td>Low</td>
<td>Implement a legacy or revised system. A legacy system should require sufficient documentation justifying that data are complete, consistent, of similar interpretation, and practicable. A revised system should include the same documentation and will require an amendment to the state’s ESEA consolidated state plan.</td>
</tr>
</tbody>
</table>

policies around subgroups and school size, setting, and demographics. | Inappropriately distributed, or include schools that are unexpectedly low or high performing. |
Implementation Phase – Key Questions

- What are my biggest areas of concern given information collected during the Development Phase?
- What modifications could be made?
- What is my intended plan for implementation?
- What is Plan B?
Dimensions of Modification

• Indicators and Measures
• Summative Determinations
• Performance Expectations
• Identification Decisions
• Reporting Decisions
Consider the Claims!

- Clarify use case
- Specify underlying claims and supporting evidence
- Articulate proposed system design for 2020-2021
- Articulate a Plan B
Evaluation Phase

• Develop an evaluation plan based on operational data from 2020-2021.

• Identify how the data can and should be used in 2020-2021 given this information.
Conclusion

Process is intended to help a state consider and address key questions that inform its plan for implementation of accountability in 2020-2021.

• How well does our system align with the state’s theory of action, policy goals, and priorities?
• Do we need to revise our system to better reflect existing or shifting state priorities?
• What claims should be evaluated that we are making at the indicator and system level? What is the impact on our overall system if certain claims cannot be substantiated?
• Given the potential impact of COVID-19 disruptions on the system’s claims and data, how should we approach accountability implementation in spring 2021? How should results be used?
Reflections from our Panel
Chris Janzer
Director of Accountability
Michigan Department of Education
RILS Future of Accountability

Chris Janzer – Michigan Department of Education
Michigan Systems Overview

• Michigan School Index – Summative, 0-100 index score, proficiency, growth, graduation rate, EL Progress, assessment participation, chronic absenteeism, access to arts/PE, access to librarians, advanced coursework, postsecondary enrollment, fulfills ESSA requirements

• Michigan School Grades – Non-summative, A-F grades and rating labels, proficiency, growth, graduation rate, EL Progress, performance among peers, assessment participation, chronic absenteeism, subgroup performance, fulfills state law requirements

• Parent Dashboard – little “a”, comparison with peers and state, ~30 metrics
Alignment

• How well does the accountability system align with the state’s theory of action, policy goals, and priorities?

  • Michigan’s priorities include identifying and supporting schools that are struggling the most to help students meet Michigan’s standards
  
  • School Index system (ESSA) is tied to strategic plan which was just revamped
  • School Grades (state law) intent was to comply with ESSA
  • Parent Dashboard aligns with policy goal of providing parents a holistic picture of their child’s school
Revisions

• Does the system need to be revised to better reflect the state’s existing or shifting priorities?
  • Opportunity exists to amend the School Index to better align with new strategic plan
    • Long term goals and interim measures of progress
    • Exit criteria and identification cycle
    • Indicators and indicator weights

• Parent Dashboard
  • Easiest system to modify metrics

• School Grades system cannot be revised absent a change in state legislation
Evaluation and Impact

• What claims should be evaluated that are being made at the indicator and system level? What is the impact on the overall system if these claims cannot be substantiated?
• All indicators will need to be reevaluated
  • Legislation regarding attendance has changed – more flexible
    • Graduation requirements for 2019-20 also were relaxed
  • Current assumption is that all indicators will be complete for 20-21
    • Reevaluation for consistency (across years, across student groups, across school types)
    • Look closely at overall outcomes – can we justify these results as is, or do we need to make changes beyond tweaking indicators and/or targets?
• Index System – see more flexibility to modify as needed
• School Grades System – less flexibility, cannot modify indicators
• Parent Dashboard – use of disclaimers, perhaps some metrics unavailable
Implementation and Reporting

• Given the potential impact of COVID-19 disruptions on the system’s claims and data, how should accountability implementation in spring 2021 be approached? How should results be used?
  • Set expectations for delayed/partial/no results
    • Assume much time will be spent carefully and thoroughly examining data to determine confidence in calculating and reporting results
    • High confidence = systems run with little/no modifications, some explanatory text added to reporting
    • Low confidence = systems run with many modifications/partial results, disclaimers used to highlight limits of data. Some results may not be made public
Maria Harris

Deputy Superintendent of Assessment & Accountability

Oklahoma Department of Education
RILS Outlook for Accountability

Maria Harris
Deputy Superintendent of Assessment & Accountability
Oklahoma’s Theory of Action

• Oklahoma believes **all students can grow and all schools can improve**.

• An accountability system should provide **accessible, meaningful and actionable** information about public schools.

• Accountability should be integrated in a **cycle of continuous improvement** for schools, identifying what is working and what may be improved.
Oklahoma School Report Cards

• Schools receive a summative A-F letter grade

• A-F letter grade for each indicator:
  • Academic Achievement
  • Academic Growth
  • English Language Proficiency Assessment
  • Chronic Absenteeism
  • Postsecondary Opportunities
  • Graduation
