Overview
How does classroom assessment need to change to support student learning in remote or hybrid contexts? We explore and discuss in this webinar approaches to move learning forward with assessment strategies to support deeper and more authentic learning for students whether they are being educated in schools or remotely.

Agenda
Each of the three major sections of the agenda will start with a five (5) minute presentation that will conclude with a set of questions to a moderated panel of national and international experts.

1:00 Welcome, introductions, Zoom and webinar protocols

1:05 Overview of the Classroom Assessment Principles to Support Teaching and Learning as a framework for considering classroom assessment in remote/hybrid settings
